IMPORTANT UPDATE | Vaccination clinics continue

Dear parents and guardians,

I hope you are all well as March draws to a close and that you are feeling the spring slowly creeping into your areas.

Various vaccination clinics continue in our schools and in the community. They remain one of the safest ways to protect the health of our students.

COVID-19 Clinics

Vaccination clinics for children aged 5 to 11 years are still ongoing. We invite you to consult the documentation prepared by your local public health unit. You will find useful information on both the vaccines and the clinics offered.

School Immunization Catch-up Clinics for Grades 7-12 (Ottawa Schools)

If your child has not been able to attend a school-based immunization clinic organized by the Ottawa Public Health office, there are a number of options available to your child to get vaccines against certain viruses such as hepatitis B, human papillomavirus (HPV) and meningococcus. For Ottawa schools, Ottawa Public Health is holding clinics in the community. We invite you to read [the memo](#) on this subject.

I thank you for your cooperation and I wish you a safe and healthy weekend.

Sylvie C.R. Tremblay
Director of Education
